Programming Experiences

Safety in Numbers *Backend Developer*

Project for "Dream it. Code it. Win it." a competition held by MIT, won the May 2015 Microsoft Prize.

– Developed an app that assigned police precincts a general safety rating based on the city's crime data.

– Used Java Server Pages and learned how to run a basic webpage.

Picky *Backend Developer*

"DefHacks()", a hackathon hosted by CSTUY, our project won award for Best Design.

– Programmed an app that generated a list of restaurants based on what the user did NOT want to eat.

– Webserver hosted in Python Flask and accessed Yelp's REST API.

Nutritrades *Backend and Middleware Developer*

"Dream it. Code it. Win it." submission project for this year.

– Created a website that allowed users to post and sell produce they grew themselves.

– Webserver hosted in Node.js and Express.

DandD *Full Stack Developer*

Software Development Final Project.

– This application's goal was to create an organizing tool for Dungeon Masters.

– Written with Python Flask and Mongodb.

ELWire *Arduino Board Programming*

Programmed electrical suits for our schools̈ annual "Sing!" performance in C++.

Languages *In order of fluency*

JavaScript, Python, Java, C/C++, Ruby.

Work/Volunteer Experience

Brooklyn Public Library Central Branch *Foreign Language Volunteer*

Work consisted mainly of collaborating with other employees to relabel and reshelve books.

Spicy Bampa *Busboy*

Served as waiter here for a summer, then was transferred to larger branch. Came into contact with customers often.
